◆◆◆◆◆◆◆◆ | MAVI BEYAZ PULL UP ADULT PANTS

Wraps the body 360° with its anatomical structure and offers an underwear like comfort. Even if the inner surface gets wet it traps the wetness and skin remains dry.

Textile surface permeates the air, and prevents the rise of the temperature and perspiration. Specially designed for individuals with light incontinence (bladder weakness), the fully anatomical, wearable, and soft pant diapers feature a non-woven surface, leak-proof leg barriers, and elastic waistband, ensuring superior fluid protection and freedom of movement.

Mavi Beyaz Pull Up Adult Pants can be easily worn like regular underwear and removed effortlessly thanks to its specially designed side seams, providing maximum comfort and ease of use.

## MAVI BEYAZ PULL UP ADULT PANTS |

Its 360-degree tight-fitting anatomic design offers underwear comfort. It enables its users to easily take part in social life. It prevents the irritation of the user's legs thanks to its tight-fitting special anatomic design and pleats between legs.

While it provides a safe use with its liquid tight leg barriers that prevent leakage and its cloth structure, it provides also comfort with its skin-friendly dermatological structure. Its 3-layer (external, absorbent and inner) textile surface helps the skin to breathe.

Breathable Surface

MAVI BEYAZ PEDEXTRA ADULT DIAPER

PedExtra anatomic incontinence diapers are designed to increase the living standards of their users and patient relatives and to provide comfort and safe protection with their high usage comfort and high skin protection.

Its white exterior surface with Mavibeyaz logo has a cloth-similar structure. Thanks to this structure, it helps the skin to breathe. It helps to prevent the heat increase and sweat of the skin and accordingly, the skin irritation. It is an important assistant in protecting the skin health for the care of patients who use patient diapers particularly at nights and/or for long time. The blue layer (ADL- Acquisition Distribution Layer) that quickly distributes the liquid to lower layers accelerates the distribution of the liquid in order to prevent the contact of the liquid with the skin.

The absorbent particles (SAP-Super Absorbent Polymer) that provide high absorption power in the inner layer, which quickly absorbs the liquid, jellyfy and absorb the liquid to prevent its rise to the surface again. While it ensures that the skin remains dry, it also helps to prevent the skin irritation.

## MAVI BEYAZ PEDEXTRA ADULT DIAPER |

Thanks to its side tabs that can be opened and closed again and again, it can be repeatedly opened and closed where necessary. It prevents the irritation of the user's legs thanks to its tight-fitting special anatomic design and pleats between legs. While it provides a safe use with its liquid tight leg barriers that prevent leakage and its cloth structure, it provides also comfort with its skin-friendly dermatological structure. The wetness indicator on its exterior surface helps patient to understand when to change the diaper.
